

UNISTRUT
MIDWEST

Modular Structural Support Systems

At Unistrut Midwest, we leverage innovative prefabrication techniques to craft secondary steel support structures using Unistrut and Sikla materials. Our solutions streamline your build, enhance efficiency, and deliver modular supports quickly—all while staying within budget.

Who We Are

As a trusted nationwide leader in fabrication, we specialize in delivering all-bolted solutions for pipe racks, off-site modules, and equipment skids. Our turn-key services cover every step of the process—conceptual design, budgeting, engineering, BIM coordination, material supply, prefabrication, assembly, and delivery. We exceed client expectations and are committed to providing the highest quality customer service.

Deep Industry Experience

We are committed to providing innovative solutions that will help you complete your project faster and more efficiently.

Dedicated Engineering Services

We have dedicated resources to engineer a custom solution for nearly any application, no matter the challenge.

Speed to Market Focus

We understand the importance of quick execution and delivery, keeping your project on time and within budget.

Our Services

Supply and Inventory

We carry the largest on-hand inventory of Sikla and Unistrut products in the US, allowing us to keep projects on schedule, and minimize dependence on the manufacturer's supply chain.

Prefabrication Capabilities

We have dedicated facilities and specialized teams to handle projects of any size, helping you save time, enhance safety, and reduce labor costs.

Modular Steel Offerings

We use innovative modular steel systems such as Sikla siFramo and Unistrut to create all-bolted modules and rack systems. Our systems are faster to assemble and provide future flexibility.

Engineering and Design

We offer structural rack design packages utilizing both 2D and 3D design platforms. We are able to provide P/E Stamp Drawings, BIM Coordination, and Shop Drawings for any of our designs.

sikla

Design and Fabrication Experts for Modular Rack Systems

Unistrut Midwest is a national leader in the design and engineering of Modular Steel Rack Structures and Supports. Our Sikla and Unistrut solutions are field-adjustable, lighter in weight, and faster to assemble than traditional welded steel modules, offering unmatched efficiency and flexibility.

Our team of experienced professionals are dedicated to assisting clients with their specific needs, whether it's designing customized solutions or providing technical assistance. We are committed to going above and beyond to meet and exceed customer expectations.

Trust Unistrut Midwest for your secondary steel support system needs.

Modular Solutions

The Unistrut Midwest rack systems are designed with all-bolted connections to allow for adjustment to changing requirements or field conditions.

Speed to Market

Our modular steel systems can be assembled 300-500% faster than traditional welded structures.

Support Experts

Unistrut Midwest specializes in designing and fabricating custom support structures, dedicated to delivering the perfect solution tailored to your project's unique requirements.

Fabrication Capabilities

We have the ability to offer fully assembled modules, flat packed kits, or cut-to-size material. Use our labor to complement your project teams and be more efficient.
