M I D W E S T

Prefabrication Solutions for Electrical Services

Prefabrication offers precise, high-quality components that accelerate construction timelines and cut cost through optimized material utilization. Advanced technologies and strict quality control enhance safety and expand design possibilities, allowing for greater creativity in construction projects. Prefabrication also minimizes weather impacts, increases flexibility, and reduces safety risks for workers on-site.

Who We Are

As a trusted nationwide leader in prefabrication, Unistrut Midwest specializes in delivering all-bolted solutions for pipe racks, off-site modules, and equipment skids. Our turn-key services cover every step of the process—conceptual design, budgeting, engineering, BIM coordination, material supply, prefabrication, assembly, and delivery. We exceed client expectations and are committed to providing the highest quality customer service.

Prefabricated Trapezes

Deep Industry Experience

We are committed to providing innovative solutions that will help you complete your project faster and more efficiently.

Dedicated Engineering Services

We have dedicated resources to engineer a custom solution for nearly any application, no matter what the challenge.

Speed to Market Focus

We understand the importance of quick execution and delivery, keeping your project on time and within budget.

Our Services

Our prefabricated solutions are custom designed for your needs, built to your specifications off-site, and easily installed as a complete solution. Unistrut and Sikla both allow for easy adjustments to accommodate any changes to future electrical needs. Our services range from providing cut-to-size kits for your team to assemble complete electrical skids ready for installation.

sikla

Design and Prefabrication Experts for Electrical System Supports

With the largest in-stock inventory in the nation, Unistrut Midwest is a leader in the design and engineering of modular support systems. Our Sikla and Unistrut solutions are field-adjustable, lighter in weight, and faster to assemble than traditional welded steel modules, offering unmatched efficiency and flexibility.

Our prefabrication services range from sending you cut-to-size kits for your team to assemble to complete electrical skids ready for installation. Whether it's designing customized solutions or providing technical assistance, we are committed to going above and beyond to meet and exceed customer expectations.

Electrical Panel Supports

Modular Solutions

All our support systems are designed with bolted connections to allow for adjustment to changing requirements or field conditions.

Speed to Market

Our modular steel systems can be assembled 300-500% faster than traditional welded structures.

Support Experts

We specialize in designing and fabricating custom support structures, dedicated to delivering the perfect solution tailored to your project's unique requirements.

Fabrication Capabilities

We can offer fully assembled modules, flat-packed kits, or cut-to-size material. Use our labor to complement your project team and be more efficient.
